System Features

Tulsa Tech has six campuses serving students in the Tulsa metro area. They were looking to expand and wanted to provide technology-centric classes utilizing the latest in AV technology. The new AV systems play a part in maintaining the high bar expected for high-tech instruction.

- The campus embodies a new conference center and 25 classrooms, which include video projection, sound reinforcement and digital control systems
- All conference center rooms have digital room-scheduling signage
- The extensive AV systems are interfaced using Audio Video Bridging (AVB) and placed on a network using both fiber and CAT5
