

Project Profile

BBVA Compass Stadium
Houston, TX

Scan QR code to view related video.

System Features

The stadium required an AV system that had multi-purpose capabilities. It has extensive high-quality systems that assist officials with live broadcasts.

- A distributed stadium-wide, high output speaker system was installed with more than 90 speaker locations throughout, a large DSP system and numerous stand alone AV systems installed in team stores, ticketing areas, clubs, corridors, and press rooms
- The stadium has an HD video production suite with HD cameras, broadcast switching system, video routing system, slow motion system, character generator, and intercom communication systems, as well as, CATV distribution to over 200 TV locations
- There is 250,000 feet of broadcast cabling infrastructure and connectivity for TV and radio broadcasting use and a coaching intercom system throughout the stadium
