

Project Profile

HomeAway, Inc.
Austin, TX

System Features

When HomeAway grew, they needed new technology to keep up with growing trends. As part of a global videoconferencing initiative that includes mobile computing applications, the company now has more than 25 videoconferencing endpoints in the U.S. and other cities around the globe.

- The main conference room in the Austin headquarters has videoconferencing equipment, projectors, displays, content sharing, and a control system
- The Penn Field Training Room utilizes videoconferencing, audio and video for training environment activities
- The "Bird House" is an area that combines videoconferencing, presentations/content sharing, sound, and lighting for use during weekly meetings
