

Project Profile

Juanita J. Craft Recreational Center
Dallas, TX

System Features

This recreational center's goal is to weave diabetes prevention into the fabric of the community. Utilizing the latest AV equipment this center is able to assist the community members in learning more about diabetes.

- A classroom video system that features a two-camera system with a broadcast video switcher, graphics generator, and video editor, allows the center to broadcast its healthy cooking class on the Internet
- The facility has quality sound systems, AV control systems and portable broadcast systems
- A feature-rich video conferencing system is the highlight of the center's boardrooms, including multi-point video conferencing with ability to transmit video to other sites without interrupting the call
