

Project Profile

MD Anderson Cancer Center
Houston, TX

System Features

MD Anderson, a medical center known for being innovative in patient care and making advances in medical treatments, is investing in state-of-the-art technologies to conduct minimally invasive surgical practices.

- The high-tech Brain and Spine Suite includes ceiling-mounted, PTZ cameras that provide surgeons with real-time images on video display panels
- Medical personnel are also able to record audio and video to DVRs with removable hard disk drives for later editing and broadcasting for educational purposes
- A touchpanel system allows users to operate audio, video and camera controls
