

Project Profile

Regis University - Denver Tech Center
Denver, CO

System Features

When moving to a new facility, Regis University's DTC had an opportunity to create classrooms with standardized AV equipment. By simplifying the control of the systems professors and students can now enter a room and know how to operate it.

- Classrooms are equipped with a projector, screen, an input wall plate, and overhead audio
- Computer Labs include 50" displays on each wall of the room, an in-wall equipment rack, pixie control, as well as overhead audio
- A specialized observation room with an adjacent combinable classroom features displays with video feeds, headphone or overhead audio feeds, AV recording capabilities, and selectable room control
