System Features

Denver-based Cimarex is a leading exploration and production company with operations in Texas, Oklahoma and New Mexico. Recent growth became a catalyst to upgrade their AV systems.

- Six exploration conference rooms were integrated with custom 192" widescreen electric recessed projection screens for displaying content from a desktop PC capable of running multiple advanced seismic programs
- Two meeting rooms have custom tables that include equipment racks in the pedestal bases for seamless AV integration as well as videoconferencing systems to communicate with other Cimarex offices
- A visualization and collaboration room was designed with two desktop PCs located in the table and six 55" 1080p displays to show multiple programs for seismic comparison
