

Project Profile

City of Grand Prairie - Environmental Services Training Room
Grand Prairie, TX

System Features

The Grand Prairie Environmental Services was in need of a facility where public and private training sessions could occur. The department now has the AV technology to use as training tools in their newly renovated space.

- A video presentation system that includes a motorized projection screen with a bright video projector allows trainers to display clear images, video or presentations for any session
- Housed in the large training room is a wireless mic, multi-media lectern and touch panel control system to make teaching simpler for trainers
