

Project Profile

Denver Art Museum
Denver, CO

System Features

This architecturally unique building added 30,000 square feet to the existing art museum, and includes the latest audio, video and lighting systems.

- HD video projection systems are featured in the facility
- A video camera production system is used to record presentations
- Theatrical lighting with LCD panels and wall controls allow users to optimize the lighting for each event
- Audio systems provide sound reinforcement of presentations and performances, assisted listening and cinema features
