System Features

The 950,000-square-foot, 40-floor renovated spaces at Shell include collaborative environments with a variety of room sizes for different purposes, open and private offices, conference rooms, energy hubs and break rooms, as well as a fitness center. The facility is designed to ensure the staff can perform to their fullest potential with the latest planning and technology advancement.

- The facility includes more than 500 rooms with AV systems; room technology includes digital audio and video transport, switching and touchpanel control systems throughout
- There is building-wide digital signage, CATV, and room scheduling, as well as large scale video wall visualization systems
