

Project Profile

St. Andrew's Episcopal School - Dell Fine Arts Center
Austin, TX

System Features

This fine arts center is the newest addition to the school and houses the latest AV technology. It includes a 500-seat auditorium theater with orchestra pit and stage extensions, a black box theater, as well as a scene shop.

- Production intercom systems that can act independently or together are installed in central areas of the facility allowing easier communication during productions
- The digital projection system has a 3D, HD projector, a 25' rolleromatic screen, as well as surround sound for video playback, and a left-right-center speaker cluster with delay ring
- The facility also includes portable racks, FOH mixing console and assisted listening systems throughout the main theater
