

# Project Profile

University of Texas at El Paso - Chemistry and Computer Science Building  
El Paso, TX

## System Features

The 150,186-square-foot building houses two departments – chemistry and computer science – from two colleges – science and engineering. The facility is designed to promote collaboration between the two colleges and houses modern AV technology for advancing education.

- Conference rooms have audio, video, touchpanel control, and videoconferencing systems
- Classrooms and teaching labs include custom lecterns, audio and video projection systems, control systems, and interactive annotation displays
- Digital signage locations utilizing multiview video and control over UTEP equipment
- There is an “immersive space” with audio, projection and touchpanel control systems
