

+ Ford AV 5-Point Checkup for Critical Spaces

It makes sense to have fire extinguishers and alarm systems regularly inspected so they are ready in times of need. Sometimes the technology we use every day may be assumed to be fully-functional at all times.

Likewise, if your organization depends on critical rooms and spaces for essential communication, consider Ford AV's 5-point checkup for areas such as:

- ❗ Situation Room
- ❗ Incident Command Center
- ❗ Boardroom
- ❗ SCADA Room
- ❗ Command Center
- ❗ War Room
- ❗ Network Operations Center
- ❗ Executive Briefing Center

Benefits of Ford AV's 5-Point Checkup

- ✔ Systems are tested for functional operation.
- ✔ Users are aware and prepared for using systems.
- ✔ Written report provided with improvement recommendations.
- ✔ Increased confidence in readiness of system operations.

5-Point Checkup for Critical Spaces

- PHASE 1** Technical evaluation of AV communication system functionality in critical spaces.
- PHASE 2** User training including a Needs Assessment and training delivery (live or on-demand eLearning).
- PHASE 3** User interface (UI) review and evaluation for effective access and control of AV system functions.
- PHASE 4** Facilitation of an Emergency Response Exercise with your staff using and controlling AV systems.
- PHASE 5** Final report and provision of training reference materials.

***Failure to plan is a plan to fail.
Don't let a real incident be your test.***

With deep and wide technical expertise, Ford AV designs, installs and maintains mission critical systems for international airports, stadiums, arenas and major corporations.
