## System Features

FlyingTee is a state-of-the-art golfing facility that provides value to beginners and serious players alike. Ford AV first partnered with the facility in its infancy to help design an optimal playing experience. The project features 60 driving bays, which extend over three floors, as well as an outdoor putting green.

- Each bay features a heads-up display, touchscreen interface and two gallery displays
- 200" diagonal, 4x2 video wall and 360-degree LED sports ticker are visual centerpieces
- 300+ displays and 160 speakers supply video and audio to 20 different areas via a central control system and specially designed interface controlled by iPads
- Robust network infrastructure includes OM4 fiber interconnects, Cisco switchgear and wireless access points
