System Features

Described as the Comcast of Europe, Liberty Global is a powerhouse for telecommunications and television. Ford AV was asked to partner with Liberty Global to tackle unique challenges at their US headquarters in Denver. For example, their stunning marble conference room required complete 360 degree viewing capabilities despite having two large windows on either side of the room. Overall, the project covered 21 rooms over 3 floors (including 3 custom executive offices) and 3 video walls in the main lobby.

- 120" 4K display craned into the building
- Mosaic video wall in lobby contains 22" and 42" displays
- X-shaped video wall contains 52" and 46" displays
- Crestron control systems and Cisco video conferencing network
- Sound reinforcement including Dolby Atmos surround sound
