System Features

Oklahoma Heart Hospital is one of the four centers in the US that offers the Pritikin Intensive Cardiac Rehab (ICR) program; a professionally supervised program to help people recover from heart attacks, heart surgery and other heart-related procedures. Classes are offered that teach participants how to eat well, exercise, feel better and live better. Ford was contracted by Oklahoma Heart Hospital to make upgrades to their cardiovascular rehabilitation room, multipurpose room and educational kitchen to better serve their patients.

- Overhead camera system and displays installed in kitchen so patients can watch instructor prepare a meal
- Displays throughout the Cardiovascular Rehabilitation Room installed to provide entertainment as patients exercise
