System Features

Located in the heart of Breckenridge, Colorado, the Riverwalk Center is an award-winning performing arts facility focused on community entertainment. In order to host the variety of events throughout the year, the facility required multifunctional audio & video systems.

- High lumen HD projector includes sound dampening enclosure, reducing noise
- Retractable 28' front-projection video screen provides room versatility and staging
- Audio system features surround sound speakers with digital signal processor
- 90" HD displays flanking each side of stage enable better viewing options for guests
- Integrated touch panel control provides custom control of AV system
