System Features

UT Southwestern's nine-story, 400,000 SF complex is the result of years of collaboration and design. The medical facility's AV integrates UT Southwestern's academic and clinical offices with one of the largest simulation and clinical skills training centers in the nation.

- Executive Conference/Training Center utilizes 98" 4K displays, fully integrated teaching lecterns, annotation monitors, HD PTZ cameras and touch panel controls
- Standardized Patient (SP) Training and High-Fidelity Simulation Suites contain 100+ HD PTZ cameras and embedded audio/haptic device input plates that capture training information that is managed, archived and playback enabled for training sessions
- Large conference rooms offer 86" 4K interactive displays with PTZ cameras, distributed audio and table-top touch panel control
- Digital signage throughout the building utilizes thirty-five 65" 4K displays
