System Features

The Gathering Place, the largest public park gift in U.S. history, completed phase one of the 100 acre project. The size and detail of the park's design necessitated a standardized AV system that blended in to both the indoor and outdoor facilities.

- 165" projection screen with custom painted speaker housing provides entertainment and presentation capabilities in Great Hall at the Lodge
- 31 outdoor rock speakers blend in with the environment and provide music and PA announcements to visitors
- 55" outdoor displays furnish digital signage and menu options at the cafe
- Custom projector lift installed in the Boathouse can extend over 30' to the floor for easy access and maintenance
- 55" display and video conferencing capabilities in the main office conference room
