Project Profile

Big Data Center
Plano, TX
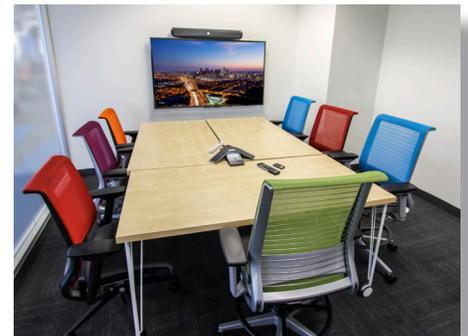

System Features

One of the world's leading telecom companies chose Ford AV to design and install standardized AV systems that feature cutting-edge technology and easy-to-use interfaces.

- Training room features a video wall with HD displays arranged in a 3x4 format with a digital processor capable of distributing video feeds in various layouts
- Control room provides video conferencing capabilities with a HD video wall and PTZ cameras controlled via touch-screen panel
- Collaboration spaces include HD displays, speakerphones and cameras
- Large conference rooms utilize built-in table microphones with LED indicator
- Small conference rooms use dual HD displays and video conferencing capabilities
- Conference rooms are scheduled with touch-screen panels and custom room scheduling software
