

Project Profile

City of Denver Community Media Center
Denver, CO

System Features

The Community Media Center is a facility designed to empower the community's content creators. The City of Denver sought a versatile system capable of adapting to each educational and production opportunity.

- Community Media Studio Room - Confidence monitor, manned camera systems, microphones, full-range speakers, PTZ cameras and teleprompter
- Digital Studio - Professional broadcast microphones, Confidence monitor, PTZ cameras and video production switcher
- Community Classroom - 18 networked workstations and HD displays
- Master Control Room - 4K displays, 16-input multi-viewer, closed caption processor and ability to send content through community access channels
