System Features

The City of Westminster, a northwest suburb of Denver, has seen an increase in populace, necessitating an upgrade to the city council chambers and board room.

- HD displays provide content feed for each person on the dais
- Wireless microphones for audience participation, awards and presentations
- ADA compliant induction loop hearing system
- Microphones for each position on the dais
- 80" HD displays for audience viewing
- Integrated control system for staff to monitor the various aspects of the audio-video and conferencing systems
- Teleconferencing capabilities in the board room include a HD camera and software
