

Project Profile

Davis School District Catalyst Center
Kaysville, UT

System Features

The Davis School District Catalyst Center focuses on preparing high school students for broadcast careers by providing opportunities for hands-on experience with state-of-the-art broadcast equipment.

- Virtual Video Wall | 20'x10' custom direct view LED wall combined with a cinema camera system for virtual production
- Editing Suites | Broadcast and production systems outfitted for live or post-production editing of video and audio content
- Foley Stage | Video and audio systems paired together for sound effect recording over production materials
- Production Studios | Lighting, audio, and video systems combined to create professional-grade environments for both live and recorded production sets
