System Features

Douglas County Libraries is an award winning public library system in the Denver suburbs. To meet increased traffic, the library district started expansion projects in 2016 at their Parker, Castle Pines and Lone Tree locations. This expansion necessitated updates to their current audio-visual system.

- Event room features 5,000 lumen HD projector and motorized projection screen
- Touchpanel control enables user to manipulate volume, inputs, screens and microphones
- Conference rooms use 65" HD displays and in-ceiling speakers
- Distributed speakers and VoIP phone system provide paging system capabilities
- Digital signage is achieved with networked 65" HD
- Study rooms are equipped with 46" HD displays and table mounted connection boxes
