

Project Profile

First Americans Museum
Oklahoma City, OK

System Features

First Americans Museum (FAM), which opened September 2021, shares the First Americans' cultural diversity, history, and contributions in Oklahoma. To create an immersive experience for visitors, the museum required custom technology solutions.

- Hall of the People | Includes a high brightness video projector, surround sound reinforcement system, and integrated controls
- Executive Boardroom | Equipped with video collaboration using large video displays, discrete ceiling mics, and integrated web conferencing
- American Indian Cultural Center Museum Forum | An interactive area for events, with a custom direct view LED video wall, sound system, and camera system
