System Features

Fannie Mae consolidated their Dallas-Ft. Worth regional offices into a new 10-story, 330,000 SF tower in Plano. They standardized their AV systems to streamline user operation and easily connect with their offices across the U.S.

- Executive conference room features a 98" 4K display and ceiling mounted microphones
- Town Hall uses dual HD video walls, wireless microphone system, infrared wireless assistive listening system and multiple wall mounted line array speakers
- HD video wall in lobby area showcases company information and live broadcast
- Large conference rooms utilize 85" 4K displays, in-ceiling speakers, tabletop microphones and touch panel controls
- Classrooms are equipped with HD displays, PTZ cameras and ceiling mounted microphones and speakers
