

Project Profile

George Bush Intercontinental Airport
Houston, TX

System Features

United Airlines occupies a 265,000 SF terminal with a state-of-the-art AV system. The new system provides clear communication between the airline and passengers so everyone can rest easy before their flights.

- **Sound System** | JBL & Meyer speakers produce crystal clear sound for speech and extended frequency response for music
- **Video System** | Displays utilize LED technology to save space with thinner cabinets
- **Paging Stations** | A variety of access points for workers allow wide-spread communication with passengers

Participants

Owner

United Airlines in partnership with Houston Airport Systems

General Contractor

Manhattan Construction

AV Contractor

Ford Audio-Video Systems
