System Features

Huntington University's Arizona Center for Digital Media Arts offers students a variety of degrees focused on video production and the digital arts. To prepare their students for the equipment and techniques used in the professional world, their classrooms are equipped with a full complement of AV technology.

- HD displays stream camera feed to multiple locations in studio
- Cyclorama walls afford white background and green screen capabilities
- Teleprompters installed on camcorder systems with teleprompter software
- HD video production switcher allows switching, recording, graphic generation, streaming and audio embedding within the system
- LED lighting fixtures and lighting controller create variety of lighting options
- Acoustical tiles dampen noise in the video studio and video control room
