

# Project Profile

Indeed  
Multiple Global Locations

## System Features

With over 13,000 global employees working in over forty-five countries, Indeed uses extensive AV technology to facilitate the workplace community.

- **Digital Signage** | Direct-view LED displays provide a large, bright, and versatile platform to deploy important messaging in multiple languages
- **Community Rooms** | Includes broadcast PTZ cameras, IMAG displays, as well as stages with television lighting and zoned sound systems
- **AI-Driven Video Conferencing** | Hundreds of meeting spaces facilitate 4 – 40+ attendees, utilizing AI features for auto framing, tracking, camera switching, background noise filtering, voice recognition, as well as beam-forming ceiling mics that increase speech intelligibility
