

Project Profile

NYU Langone Health
New York City, NY

System Features

NYU, partnered with Langone Health, is ranked in the nation's top 5 Best Hospitals and Best Graduate Schools for research. Their remodeled Murphy Auditorium and ancillary spaces included significant upgrades to their technology.

- Sound System | Speaker array technology controls sound energy on the seating area to increase speech intelligibility and reduce reflected sound
- Presentation Video System | 4K robotic cameras, web-conferencing, integrated control, all tied to a master control room for recording, broadcast, and streaming
- Direct-View LED Display | 32' wide display is used to visually impact each visitor's experience, while promoting events and brand messaging

Participants

Owner
New York University

Architect
Ennead Architects, LLP

General Contractor
Lend Lease Construction

Consultant
Jaros Baum and Boles
