

Project Profile

Oklahoma State Capitol House of Representatives
Oklahoma City, Oklahoma

System Features

For the past ten years, the Oklahoma State Capitol has undergone extensive renovation to improve safety and accessibility in an effort to modernize technology and elevate the visual grandeur of the 105-year-old people's house.

- **Audio Systems** | Digitally steerable line array loudspeakers installed near the voting display enhance sound quality, while each representative's desk features its own 2.5-inch audio speaker and microphone
- **Video Systems** | PTZ cameras with controllers, combined with multiple HD displays, capture every detail near the podium, at the upper dais, and in the press area
- **Integrated Control Systems** | 22-inch touchscreen monitor programmed to manage system functions and provide users with easy control
