System Features

Opened in 2017, The Silverthorne Performing Arts Center is a multi-functional performance facility. In order to host a plethora of events, the building required an adaptable AV solution.

- CCTV system enables the control area to monitor the lobby and hallways during events
- Speakers and control system in the lobby plays live audio or prerecorded messages
- Mobile speakers in the main performance area provide room versatility
- Intercom system connects the backstage rooms for uninterrupted communication
- Displays in the lobby broadcast live performance or information
- Performances are controlled through command consoles in the production booth
- Conference room with HD projector provides wireless presentation capabilities
