

Project Profile

Stillwater City Council Chambers & Municipal Court
Stillwater, OK

System Features

The council chambers is a multipurpose space used for city council, planning commission, municipal court, and other functions.

- The video production system consists of HD cameras, mixing console, HD video distribution over Cat5 cabling, HD video recording and archiving, and HD encoding to broadcast council and planning meetings
- The control booth includes camera control, a windowed preview monitor, audio monitoring and is invisible to the users of the room for a seamless experience
- Advanced audio control allows the operators to easily switch between audio sources for various types of meetings
