

Project Profile

City of Grand Prairie - Environmental Services Training Room
Grand Prairie, TX

System Features

The Grand Prairie Environmental Services Department needed a versatile facility capable of hosting both public and private training sessions. Their newly renovated space now features advanced AV technology designed to enhance learning and communication.

- A high-brightness projector paired with a motorized screen delivers crisp images, video, and presentations for any training scenario.
- The main training room is equipped with a wireless microphone system, multimedia lectern, and an intuitive touch-panel control interface—providing trainers with simple, seamless operation.
