

Project Profile

Oklahoma State University Boone Pickens Stadium
Stillwater, OK

System Features

The renovated and expanded 60,000-seat Boone Pickens Football Stadium features a central bowl loudspeaker system.

- **Sound System** | Powered line array speaker systems installed at the end zone location provide high-output sound reinforcement to the entire stadium seating. Long-throw parabolic loudspeaker systems installed for optimal PA announcer intelligibility to the most distant seat locations, as well as down fill and side fill speakers, provide for near-field sound reinforcement
- **Control System** | The sound system is operated through a digital integrated control system, enabling precise signal routing, parameter adjustments, and automation for efficient and reliable performance
