

Project Profile

Oakland Arena
Oakland, CA

System Features

The 19,200-seat arena, home of the NBA's Golden State Warriors, was built in 1996 and in need of a video upgrade. Now, it houses the latest video solutions that allow for easy-to-use management of HD content.

- **Video System** | Throughout the arena are multiple video walls using 4K displays as well as large format displays in public spaces, concessions, and private club areas
- **Control System** | A video and digital content distribution system allows for enterprise digital signage, advertising, live in-house camera feeds, television channel line up, and concession menu boards to be managed from a central location
