

Project Profile

U.S. House of Representatives - Veterans Affairs Committee Boardroom
Washington, D.C.

System Features

The U.S. Veterans Affairs Committee Boardroom has modern AV technology to provide organized and effective hearings, meetings, and general discussions about veterans' programs, current laws and other affairs.

- **Sound System** | Custom-built line array speakers are installed with DSP-based sound processing, assistive listening and Internet streaming
- **Control System** | The digital system features push-to-talk units with individual gooseneck microphones along with a digital switching system that allows the chairman to mute any or all microphones at the touch of a button
