

SEE WHAT CAMERAS CAN'T

Privacy-Safe Awareness for the Spaces That Matter Most

HALO™ 3C Smart Sensor from Avigilon, part of Motorola Solutions, is designed to provide real-time awareness in areas where cameras are not allowed. It detects vaping, THC, aggression, air-quality issues, and emergency keywords — without capturing video or recorded audio.

WHY IT MATTERS

Traditional cameras leave blind spots. HALO fills those gaps with instant alerts that allow staff to respond before incidents escalate. Instant text and push alerts notify staff the moment an incident is detected, enabling faster awareness and response across the facility.*

**Requires connection to the Avigilon Cloud Portal.*

HALO DETECTS

- ✓ Vape & THC use
- ✓ Aggression & abnormal sounds
- ✓ Air quality & chemical concerns
- ✓ Gunshot indicators
- ✓ Room occupancy tracking
- ✓ Emergency keyword alerts
- ✓ Privacy-safe sensing, no video, no recorded audio

IDEAL ENVIRONMENTS

RESTROOMS,
LOCKER ROOMS AND
RESIDENCE HALLS

PATIENT ROOMS,
BEHAVIORAL HEALTH
SPACES

YOUTH AND
COUNSELING
AREAS

CORRIDORS AND
BACK-OF-HOUSE
SPACES

**MORE THAN
A DEVICE.**

**A CONNECTED
SAFETY STRATEGY.**

HALO Integrates with Avigilon and Other Systems

HALO™ 3C Smart Sensor integrates with Avigilon Unity & Alta as well as access control systems, emergency paging & notifications, analytics and reporting platforms for a faster response, clearer escalation paths, and actionable data.

THE FORD AV DIFFERENCE

Ford AV goes beyond installing HALO by designing a complete safety strategy around the solution. Experience the Ford AV difference.

- ✓ Strategic placement & environmental assessment
- ✓ Alert routing and escalation design
- ✓ Integration with broader security systems
- ✓ Reporting, analytics, and long-term lifecycle planning
- ✓ National reach with local support & certified engineers
- ✓ A HALO system — not just a device
