

# Project Profile

Pennsylvania State University - Susan Welch Building  
University Park, PA

## System Features

Penn State University's liberal arts building was designed as a hub for teaching, research, and collaboration, requiring elevated AV technology solutions.

- A building-wide AV framework with projection systems, displays, ceiling speakers, cameras, and unified control interfaces supporting classrooms, seminar rooms, and collaborative spaces
- Digital signage, room-scheduling panels, and conferencing systems integrated with a complete cabling infrastructure, rack fabrication, testing, and programming
- Hybrid-ready classrooms equipped for lecture capture and multi-camera instruction, providing consistent teaching workflows across all room types
