

Project Profile

Langston University Tulsa – Allied Health
Tulsa, OK

OSU Langston's Tulsa Allied Health facility underwent a comprehensive audiovisual refresh to enhance teaching and collaboration across multiple instructional and support spaces, advancing excellence in learning and shaping the next generation of medical professionals.

- Standardized, facility-wide AV infrastructure delivering consistent performance, ease of use, and scalable operation across instructional and shared spaces
- Integrated audio systems combining ceiling and wireless microphones with in-ceiling and line-array loudspeakers to ensure even and intelligible sound
- Flexible presentation and video environments utilizing projection, flat-panel displays, PTZ cameras, and centralized touchscreen control to support instruction, collaboration, and future growth
