

# Project Profile

Aria Amphitheater - The Marq Southlake  
Southlake, TX

## System Features

The City of Southlake partnered with Ford AV to transform the Aria Amphitheater into a high-performance outdoor venue, delivering professional-grade audio, lighting, and infrastructure to support concerts, events, and community programming.

- High-fidelity line array sound system with subwoofer reinforcement and center-fill coverage, engineered for consistent audio clarity and full-venue performance
- Upgraded front-of-house digital mixing and stage lighting systems enable flexible operation for their wide range of live events
- Reinforced rigging and structural infrastructure designed for heavy-load outdoor installation, ensuring long-term durability, safety, and reliable system performance
