

Project Profile

City of Beaumont Police Real-Time Crime Center
Beaumont, TX

System Features

Ford AV delivered a fully integrated audiovisual system for the City of Beaumont Police Department's Real-Time Crime Center, transforming an existing municipal space into a mission-critical command environment that enhances situational awareness, emergency coordination, and rapid decision-making.

- Mission-critical, real-time AV ecosystem uniting video walls, workstations, and command spaces for situational awareness, incident response, and investigations
- Networked video distribution and control enabling instant routing of live feeds, data sources, and workstation content to large-format displays and collaboration spaces
- Secure, scalable AV infrastructure designed for 24/7 operation, legacy integration, unified communications, and future expansion
