

Project Profile

City of Pasadena - Emergency Operations Center (EOC)
Pasadena, TX

System Features

The City of Pasadena partnered with Ford AV to transform its Emergency Operations Center into a fully digital, mission-critical command environment, enabling real-time situational awareness and secure communication during high-stakes operations.

- 40-foot-wide video wall featuring 30 displays engineered for multi-source visualization, precision alignment, and continuous operation use
- AV-over-IP distribution system enabling secure, low-latency routing of 20+ sources across EOC, dispatch, and support spaces with scalable network integration
- Custom integrated control and digital audio environment with DSP processing and streamlined interfaces designed for clear communication and rapid reconfiguration during critical operations
