

Building Better Simulation

Whether you're upgrading one room or building an entire simulation center, we deliver turnkey solutions designed for your unique workflow

Better Design

Technology solutions determined by your specific simulation space, curriculum, and workflow needs.

Better Security

Integrated network cybersecurity and infrastructure that protects your data and devices.

Better Support

24/7 support with training, remote monitoring, responsive service and custom-tailored warranties.

Design-Build Services

- AV+IT infrastructure planning
- Simulation control rooms & observation suites
- Seamless integration with manikins and learning platforms

Network Integration

- VLAN segmentation for simulation traffic
- Protected storage for recorded sessions
- Secure remote access & monitoring

Support That Stays

- Remote monitoring & maintenance tools
- Hands-on training for instructors & techs
- Long-term service & system updates

"I had an opportunity to work with Ford AV... it was the perfect solution for us."

Dr. James Cleveland
Director of Simulation Innovation, UTSA
