

Start Early

Great simulation environments start with great design.

By partnering early in the planning process, Ford AV helps align simulation workflows, AV infrastructure, recording systems, networking, and room functionality before construction begins—reducing costly redesigns and ensuring your simulation environment performs as intended from the start.

- ✓ Project efficiency from design through installation
- ✓ Accurate technology planning & documentation
- ✓ Fewer change orders during construction
- ✓ Early identification of system and infrastructure requirements
- ✓ Clear alignment with owner expectations
- ✓ Reduced conflicts with HVAC, electrical, plumbing, and other construction trades

Ford AV works alongside simulation center directors, healthcare educators, architects, consultants, IT teams, and contractors to carefully coordinate learning ecosystems that support clinical readiness.
