

Project Profile

Netflix Albuquerque Expansion
Albuquerque, NM

System Features

Netflix engaged Ford AV for the Albuquerque Studios expansion, transforming a conventional production facility into a globally connected, enterprise-scale media campus built for advanced collaboration and content creation.

- Standardization across 100+ meeting environments featuring Google Meet systems, providing an intuitive user experience with flexible BYOD functionality
- High-performance spaces equipped with large-format displays, ceiling microphone arrays, PTZ cameras, and fully wireless room-scale conferencing technology
- Site-wide AV backbone spanning multiple buildings, incorporating digital signage, zoned audio distribution, surveillance monitoring, and scalable network infrastructure aligned with enterprise IT standards
